Incentive name

Feed-in-tariff

Brief description

Privileged producer of the feed-in tariff for electricity production

Legal reference

Legal reference name

Energy Law and Decree on Incentive Measures for Electricity Generation from Renewable Energy Sources and High-Efficiency Cogeneration of Electricity and Heat "Official Gazette of Serbia", no. 145 of December 29, 2014, 95 of December 8, 2018 - dr. law, 40 of April 22, 2021, 35 of April 29, 2023 - dr. law, 62 of July 27, 2023.

Legal reference (Law section / article)

Art. 23 Nr. 2 Regulation on Incentive Measures, Art. 4 Regulation on Incentive Measures
The amount of the feed-in tariff is determined in Art. 4 of the Regulation on Incentive Measures and it depends on the technology, the total installed capacity as well as the maximum operation time. The maximum annual operation time is established for each technology as the number of operating hours in the year, except for wind technology where the maximum annual operation time refers to the quarter of the incentive period. For each additional period of power production which exceeds the defined maximum operation, the guaranteed supplier pays the producer 35% of the valid feed-in tariff (Art. 4 Incentive Decree). The temporary privileged producer has the right to be paid 50% of the feed-in tariff for electricity produced before the start of the incentive period (Art. 4 Incentive Decree). Due to the inflation in the Eurozone, the feed-in tariffs are annually adjusted for inflation based on the formula laid down in Art. 6. of the Regulation on Incentive Measures.

Eligibility criteria

Eligibility criteria (description)

Privileged power producers (legal or natural persons), who conclude the Purchase Agreement on the total amount of generated electricity, are entitled to the incentive price. The guaranteed supplier is the obliged party. In general, all technologies are eligible; however, some limitations with regards to the installed power apply.

Wind energy

Eligible (Art. 4 Regulation on Incentive Measures).

Solar energy

Eligible (Art. 4 Regulation on Incentive Measures).

Geothermal energy

Eligible (Art. 4 Regulation on Incentive Measures).

Biogas

Eligible (Art. 4 Regulation on Incentive Measures).

Hydro-power

Eligible for plants with an installed power of up to 30 MW (Art. 4 Incentive Decree).

Biomass

Eligible (Art. 4 Regulation on Incentive Measures).
